In regards to cut line on Range Road

When orginal cutting took place in Oct 2002, I hit the line the first time since no flags indicated the line was there. At that tim a repair man came and told us that he would Temporarly would splice line and we continued to cut on both sides of line. He said when we were done he would bury the line deeper so we could cut ridge out and reslope.

When the finish work took place in July 2003, I started to cut and 1st or 2nd cut I hit the line which I thought was old line.
