RE: Complaint 0C08-001
Filed By Jeff Thompson
707 Prairie Blvd., Dakota Dunes, SD

On 11-21-2007 a sewer, water and final grade was established on this property and a 10' drainage easement on the right side of this property, shared by 709 Prairie Blvd., which also had a final grade done at the same time with utilities marked.

Due to above average rain fall in late 2007 and early 2008, there was a considerable amount of sedimentation that occurred in this area which had to be removed. No locates called in.

Knowing that the cable installers came in from the front, installed their cable at the proper depth and off to the side of the drainage swale, it did not appear to be a hazard or damage would occur to the utilities. Especially, when the 8" of material was removed beyond the rear of the home.

Our past 35 year experience record in South Dakota includes work completed in these cities:

Clear Lake	Yankton	North Sioux City
Flandreau	Vermillion	
Beresford	Elk Point	Dakota Dunes

Dakota Dunes Development: In the past 18 years, our work consisted of grading, paving, and utilities. In the past 10 years, 90% of the work performed has been by our firm.

All work in the past 12 years in the Dakota Dunes "Prairie Addition" for Dunham Homes including grading, paving, utilities, basement excavation, sewer, water, lot grading and final grading has been done by our firm.

Elk Point, SD for Dunham Homes - Past 10 years - many basement excavations, sewers, waters, lot grading and final grading.

We have never before had a citation in regards to damages to existing utilities.

This all said, in the future, our firm shall not fail to call "One Call".

Respectfully,

Larry Albenesius
