To whom it might Conlern

The day the power line was hit.
We Arrived At Job Site Around 8Am
I and Johnny yellow Cloud Strung out 200
Class pipe with lester fk. We stopped At the
road and in the process we noticed no flags
or markings Along line.
It was close to 9Am when we trenched
into the powerline. As soon As it hit
the stinger stopped. we went to the nearest
trailor to make Sure power was Out.
And After Confirming from residence
The power was off proper officials were notified
