

Locate 130920176

Century Link did not complete the locate in required time frame. NorthWestern potted our gas and found the quest cable not expecting it to be even in the dig locate. Northwestern foreman called the locator and he told us to get a relocate, which NorthWestern explained to him that we found your cables but you had not located them in this area, so it was not a relocate on our part and was in the 21 days.

Locate 131220214, 131220204

The next two are tickets that Muth had to call back in for a no response which in turn makes all utilities come back out and verify or locate their facilities which we had already located these at these addresses but went back to make sure all locates were completed for the contractor.
