---

I was only told by Shane from R&L when he was burying drops to the W. 8th apartments, that Schoenfelder told him not to bury our lines, and that if they did R&L needed to bury them over 6 ft. Or he'd probably cut through them.

This week I spoke with Schoenfelder for 5 minutes about our feeder fibers to the south of the property. He said that the architect had them planned to bury the pipes right on top of our fibers and that he would try to be careful, if not try to see if they could dig further away from our lines.

I've also talked with Jesse Royston with ELM and he was told by Schoenfelder that he was upset with this whole deal and that he was going to cut right through our stuff.
