**Describe your allegation:** Engbarth Directional Drilling Was doing a bore at said address and exposed a Duct

run that was located by a single paint mark by CenturyLink. We exposed the Duct Run and while exposing it found an additional live cable in the pothole that was in its own trench and not located. We did not damage this cable. We continued to cross the exposed utilities with the bore and after we were finished we were notified that phone service in the area was down. CenturyLink responded with field techs at which point they asked us to expose the facilities again to inspect for damage. After reexposing the utilities it was determined that there was no damage to the located facilities. At this time they continued to investigate and found that there was another duct system that they were unaware of in its own trench parallel to the one that had been exposed. This facility had not been located and was damaged by the boring machine. CenturyLink service techs admitted that day that they were unaware of the second duct system but refused to give their names or sign a damage claim prepared by Engbarth Drilling. The locate marks were not painted in bracket form on the duct run that was potholed. And there were no marks painted on the second run that was damaged. This week Engbarth Directional Drilling received a bill from CenturyLink requesting that we cover the damages. There has been several instances in the last two years where CenturyLink locators have been painting one mark on the ground and when exposing the line we find several in the vicinity. We have disputed several of these with CenturyLink but they refuse to communicate an answer on how to solve this problem. We feel that we have no other choice but to file this complaint.

**Do you believe the alleged violation to be intentional?:** No

**Why or why not?:** I do not believe it was on purpose they are a large company and they use a contractor to locate their facilities. I believe this was due to lack of training of the locators and poor records of what facilities they have.
