Subject: Re: [External] South Dakota One Call Enforcement Panel Meeting

Good afternoon Codi,

Here is a picture of the gas line we exposed at pine street. There was one call done for the property and this was not marked. I did see that I was past my 28 days and that is my mistake for not calling in a new locate. We exposed it and did no damage to it. As you can see the line was less than 4" below the surface Definitely not safe in any means. We are a very safe crew and always take the time to do our job correctly and always call whenever we expose an unmarked line. This is the third time MDU was called out to look at lines. The first 2 were abandoned and this one was live.

Please feel free to call if you have and Questions

Thanks
Shawn Karol
